CAREER OBJECTIVE:

To obtain a challenging position as a **DevOps Engineer / AWS Cloud Engineer** where I can apply my foundational knowledge of cloud platforms, automation, and CI/CD pipelines. I aim to contribute to innovative projects, enhance operational efficiency, and continuously grow my technical skills in a dynamic and collaborative environment. I am eager to learn, adapt, and support the development and deployment of scalable and reliable infrastructure solutions.

SKILLS:

- **Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch, ECS, EKS, VPC)
- **Containerization:** Docker, EKS
- **Orchestration:** Kubernetes
- **Infrastructure as Code:** Terraform, Cloud formation
- **CI/CD:** Jenkins
- **Build Tools:** Maven
- **Version Control System:** Git, GitHub
- **Operating System:** Linux (Ubuntu, CentOS), Window Server
- **Networking:** VPN, DNS, Load Balancer, Firewalls
- **Database:** MySQL, PostgreSQL, DynamoDB
- **Programming Language:** Python and libraries

EDUCATION:

- Centurion University – **8.22 cgpa** - **2024** - **MCA**(Master of computer application)

PROJECTS:

❖ Django Web Application Deployment on Kubernetes

Tech Stack: Django, Gunicorn, Docker, Kubernetes (Minikube), AWS EC2 (Ubuntu), Git, GitHub

Description:

Deployed a full-stack Django application on Kubernetes using Minikube for local orchestration and AWS EC2 as the host environment.

- Dockerized the Django application with a custom Dockerfile and configured Gunicorn as the WSGI server.
- Used Git and GitHub for version control and CI/CD practices.
- Wrote Kubernetes manifests for deployment, service, and pod management.
- Deployed the containerized app on AWS EC2 and accessed it via kubectl port-forward.
- Demonstrated end-to-end deployment workflow from development to browser access.

❖ Serverless Web Application on AWS

Tech Stack: AWS Lambda, API Gateway, DynamoDB, S3, IAM, CloudWatch

Description:

Developed and deployed a serverless web application for online bus ticket booking using AWS services.

- Designed RESTful APIs with **API Gateway** integrated with **AWS Lambda** for scalable and cost-effective backend logic.
- Used **DynamoDB** as a NoSQL database to store and manage ticket booking, user, and route information.
- Implemented authentication and authorization using **IAM roles and policies** to secure APIs.
- Enabled real-time monitoring and alerting with **CloudWatch** for logs and metrics.
- Deployed static frontend assets to **Amazon S3** for secure and fast content delivery.
- Achieved full CI/CD automation for serverless components using AWS best practices.

❖ ICC Men's T20 World Cup 2022

Tech Stack: Python, Pandas, Matplotlib, Seaborn, NumPy

- Analysed match data from the ICC Men's T20 World Cup 2022 using Python libraries.
- Performed data cleaning, transformation, and exploratory analysis with Pandas and NumPy.
- Visualized player performance, team stats, and match outcomes using Matplotlib and Seaborn.
- Generated insights on top scorers, wicket-takers, win patterns, and team comparisons.
- Delivered a summary of tournament trends and statistics through clear visual reports.

INTERNSHIPS:

1. OPTIFYX TECHNOLOGY

Certificate ID: OPTCS27250

Designation: Python Programming

Sept-01st to September-30th

- o Developed a web-based tool using Flask and Pandas to automate data cleaning, visualization, and reporting.
- o Tech Stack: Python, Flask, Pandas, Matplotlib, MySQL, Docker.
- o Built a web interface for users to upload CSV files.
- o Implemented data processing functions to clean and analyse large datasets.
- o Generated interactive graphs and reports using Matplotlib and Seaborn.
- o Deployed the application using Docker and Kubernetes on AWS.

2. CODTECH IT Solutions PVT.LTD

Certificate ID: CT6WGAU

Cloud Computing

Dec-25th to Feb-10th

- o Create and configure cloud storage on Aws S3 or Google cloud storage, deliverable: a bucket setup with example files uploaded and access permissions configured.
- o Set up monitoring for a cloud based application using Aws Cloudwatch, google cloud monitoring, or azure monitor.
- o Design a multi-cloud architecture where services are distributed across two cloud providers.
- o Implement IAM policies, secure storage, and data encryption on a cloud platform.
- o Deliverable: configured security policies and a report detailing the setup.

ACHIEVEMENTS:

➤ AWS Certified Solutions Architect – Associate

Amazon Web Service (AWS) – Issued: October 2023

Credential ID: 85238Q3K81F41BCS

Credential URL: <https://www.credly.com/badges/e28fc7d9-2914-47ee-af6f-d566f5bef837>

LANGUAGES:

- o English, Hindi and Odia
